## IT'S DENTAL HEALTH CARE MONTH FOR PETS!

It's estimated that 70 - 80% of cats and dogs over the age of three suffer from periodontal disease. Continuous bad breath, including reddened gums and an accumulation of plaque or tartar on teeth can be signs of dental problems. A checkup by the vet will determine if there is gum disease or tooth decay, or if your pet's teeth needs an annual cleaning.

**Preventative measures can include the use of products designed to help eliminate plaque buildup. So, the following dental hygiene products are provided by Pet Chef Express because we realize that taking care of your pet's teeth is important to you, and can help add several years to a pet's life:**

### **OXYFRESH PET ORAL HYGIENE SOLUTION** Now used by many customers.

## Pet Pals of the Month

Salomon was the runt of the litter and the breeder was unable to sell him, so owner Julie Rexwinkel came to Salomon's rescue! This **beautiful Golden Retriever** certainly found a good home.

Now nine years old, some of Salomon's favorite things are: tennis balls, his friend "Oscar the cat", and when in the car heading for a hike or swim, he actually smiles!

He was included in a month-long trip to Alaska (by car) for some camping, hiking, and fishing. Like many of us, Julie made sure the plans included Salomon, her faithful partner in all activities, so he'd have the time of his life. She came back with lots of great memories!

**Postscript:** Salomon recently had surgery to remove his spleen, and it tested positive for cancer. Julie is aggressively attempting to keep the cancer in remission by carefully watching his diet/nutrition, exercise, etc., and so far it's working. Take care dear friends! Customers since 2005, and because you provided a photo and article, your dog toy (Hint -They bounce!), will be delivered with the next pet food order.
